

**FOR IMMEDIATE RELEASE**

## **COURSENETWORKING ROLLS OUT NEW FEATURES IN LIGHT OF GDPR**

Indianapolis, IN May 25, 2018 – CourseNetworking LLC Indianapolis office is proud to announce compliance with the newly implemented EU General Data Protection Regulation (GDPR), and upcoming features that will help protect user-privacy.

CourseNetworking is a suite of three key products: CN full LMS, CN Post (Social) plug-in tool, and the CN ePortfolio. The CN business model supports free use by any individual user world-wide, so, naturally, there are users from the EU. Instead of solely catering to the EU population in light of GDPR, CN took the opportunity to improve products for all users by doing the following.

1. Completely updated, refined and simplified [Terms of Service](#) and [Privacy Policy](#)
2. Ensured Data Transfer Protection through [AWS Privacy Shield](#)
3. Created [Data Protection Agreement](#) (DPA)
4. Created [GDPR helpdesk article](#)
5. Created [new security and privacy-oriented features](#)

These new privacy features include a one-stop-shop Security and Privacy Checkup tool for users to easily, and completely check on their privacy and personal data usage settings and preferences. It gives users the freedom to review and modify their account security, profile privacy, ePortfolio visibility, and social activity. In addition to this check up, users can now opt out of being shown when viewing others' ePortfolios and may remove themselves completely from all search engines, both internally and externally.

The security and privacy of CN users is a high priority to CourseNetworking and is taken very seriously. This compliance is just one piece of CourseNetworking's mission: to change the way the world learns - by making CN an easily accessible, secure and free academic networking alternative to typical course-management educational platforms. For more information on CN compliance and security, please visit [support.thecn.com](http://support.thecn.com)
